

Tech Stack: Laravel (Backend) + Capacitor (Mobile Wrap) **Goal:** Build a web app MVP with 7 core features, scalable to iOS/Android, launched by Nov 2, 2025.

Design/UI References or Frontend Framework Preference

- **Framework:** Blade templates with Tailwind CSS (composer require laravel/tailwind) for responsive mobile/tablet UI. Theme: Primary #1E3A8A (blue), Secondary #000000 (black).
- **References:** Zillow's property pages (cards, forms) + Matterport's 3D tour interface for AR/Verify flow. Mobile-first; @media (min-width: 768px) for tablet. Post-MVP, add Vue.js if needed.
- **Why:** Blade/Tailwind is quick; Capacitor handles native scaling.

APIs

- **Active API Keys:**
 - HouseCanary: Bearer token (from housecanary.com/developer).
 - Renovate AI: API key (from renovateai.app/enterprise, \$40/mo for 2k renders).
 - Zillow: Key pending (zillowgroup.com/developers, 1k calls/mo free).
 - Matterport: Key (developer.matterport.com, \$9.99/mo for unlimited pulls, \$0.50/scan).
 - DocuMint: Key (documint.me, 500 pages/mo free, \$0.20/page).
 - Google Sheets: Service account JSON (console.cloud.google.com, enable Sheets API).
 - Stripe: Test keys (stripe.com, live pending).
 - *Note:* No OpenAI or RentCast—flips only.

- **Rate Limits/Budget Caps:**
 - HouseCanary: 1k calls/mo; cap 20/mo (Professional), 50/mo (Business), 200/mo (Enterprise). Budget: \$25/mo if upgraded.
 - Renovate AI: 2k renders/mo; cap 20/50/200 per tier. Budget: \$40/mo.
 - Zillow: 1k calls/mo; cap 20/50/200 per tier.
 - Matterport: Unlimited pulls, \$0.50/scan; cap scans 20/50/200 per tier. Budget: \$9.99/mo + usage.
 - DocuMint: 500 pages/mo free; cap per tier usage, budget \$10/mo max.
 - Alert me (your email) via Sentry if API spend >\$50/mo.
- **Glow-Up Prompts:**
 - Dropdown: "modern," "rustic," "minimalist" (default "modern").
- **Matterport Scans:**
 - Dev to handle \$0.50/scan billing via Matterport API; track usage per user.

Billing & Subscription Logic

- **Pricing Tiers:**
 - Professional: \$99/mo – Up to 20 properties/mo (A-G features).
 - Business: \$199/mo – Up to 50 properties/mo (all Professional + Priority Support).
 - Enterprise: \$499/mo – Up to 200 properties/mo (all Business + Custom Branding, Team Seats, API Access, White-Label PDF, Dedicated Onboarding).
- **Overage Handling:**
 - Block users at limit (modal: “Quota hit! Upgrade to [next tier].”). Log overages—no Stripe invoices.
- **Auto/Manual Upgrade:**
 - Manual via Stripe checkout—no auto-upgrades.

- **Trials/Discounts:**
 - 7-day free trial for all tiers.
 - 20% off first month for verified 5-star reviews (screenshot upload UI).
- **Team Seats:**
 - One billing per team (Enterprise). teams table (id, name, owner_id) with user_team pivot. Limit 5 users, +\$50/mo for 10.

Deployment

- **Hosting:** DigitalOcean (\$5/mo droplet).
- **Environments:** Staging + production (.env.staging, .env.production).
- **Domain/SSL/Email:** pixrup.com (register if not done), Let's Encrypt, Mailgun (\$10/mo).

Data

- **Existing Data:** Start empty; plan CSV upload later.
- **Property Usage Count:** Per valuation (HouseCanary call = 1). Track in users (usage_count, reset monthly).
- **Tables:** users, flips, teams (add for Enterprise). Index user_id, created_at.

Logs

- **Sentry & Logs:** Yes, enable Sentry, centralize to /storage/logs/laravel.log.
- **Alerts:** Queue backlog (>100), API spend (>\$50/mo), failed jobs (>5/day). Email me + Slack.
- **Admin Access:** You only (admin flag).

UX & Customer Flow

- **Post-Registration:** Welcome screen → Google sign-in → Flip Scanner.

- ❑ **Quota Behavior:** Modal block with upgrade prompt.
- ❑ **Email Notifications:** Job done, quota limit (1 day before), payment failed (24h). Use Mailgun.

Documentation

- ❑ **Format:** Markdown (README.md) + OpenAPI.
 - ❑ **Collections:** Postman + Swagger.
 - ❑ **Instructions:** Yes, include server setup, migrations, creds.
-

Feature Blueprint (A-to-Z)

A. Address Autofill

- ❑ **Route:** GET /address/autofill/{query}.
- ❑ **Logic:** Use Google Places API (key needed) to suggest addresses (e.g., "123 Junk St, Chicago").
- ❑ **View:** welcome.blade.php → Text input with autocomplete JS (e.g., Google Maps Places library).
- ❑ **Mobile:** Capacitor integrates native geolocation.

B. Appraisal (HouseCanary)

- ❑ **Route:** POST /api/v1/appraisal.
- ❑ **Logic:** Guzzle to HouseCanary, cache 24h, store in flips.
- ❑ **View:** appraisal.blade.php → Form, camera upload, card (\$145k, \$25k).
- ❑ **PDF:** Dompdf with watermark if free.
- ❑ **Tier:** 20/50/200 per tier.

C. Glow-Up (Renovate AI)

- ❑ **Route:** POST /api/v1/glowup.
- ❑ **Logic:** Upload image, call Renovate AI, save render URL.

- **View:** glowup.blade.php → Slider (before/after) with range input.
- **Tier:** 20/50/200 renders.

D. Spy Hunt (Zillow)

- **Route:** GET /api/v1/spy-hunt/{zip}.
- **Logic:** Parse Zillow XML, filter off-market, limit 10.
- **View:** spy-hunt.blade.php → List with links to appraisal.
- **Tier:** Enterprise only (20/50/200).

E. Live Collab (Firebase)

- **Route:** POST /api/v1/collab.
- **Logic:** Firebase Realtime (composer require kreait/firebase-php), store doodles/text.
- **View:** collab.blade.php → Canvas (draw), chat input, invite link.
- **Tier:** All tiers, 20/50/200 sessions.

F. AR Try-On (ARCore)

- **Route:** GET /api/v1/ar/{flip_id}.
- **Logic:** Return render URL for overlay.
- **View:** ar.blade.php → Web view with AR.js (basic AR overlay—dev to enhance).
- **Tier:** All tiers, usage tracked.

G. Virtual Verify (Matterport)

- **Route:** POST /api/v1/verify.
- **Logic:** Matterport API scan (\$0.50), store 3D model URL.
- **View:** verify.blade.php → Scan button, embed tour.
- **Tier:** Enterprise (20/50/200 scans).

Z. Export & Close

- **Route:** GET /POST /api/v1/export/{type}/{flip_id}.
 - **Logic:** PDF via DocuMint (logo if Enterprise), Sheets via Google API.
 - **View:** Buttons on results.
 - **Tier:** All tiers, 20/50/200 exports.
-

Mobile Wrap (Capacitor)

- npm install @capacitor/core @capacitor/cli.
 - npx cap init pixrup com.pixrup.app.
 - npx cap add ios android.
 - Sync to Laravel public folder, build with npx cap run.
-

Your Move

- **Send This:** Email to dev now.
- **Keys:** Share all APIs, confirm pixrup.com.
- **Check:** Progress by Oct 22.

You're the boss—I won't forget again. Seven features, full power.
